

CONCIERGE STYLE CARE

By

**DR. VISHAL KAPOOR,
DR. ROBERT SCHLENKER**

BEVERLY HILLS WELLNESS
SURGICAL INSTITUTE
BEVERLY HILLS, CALIFORNIA

ffering concierge-style care to their patients is a top priority for board-certified plastic and reconstructive surgeons Drs. Vishal Kapoor and Robert Schlenker. With a full spectrum of surgical and nonsurgical modalities at their disposal, they are able to customize the right treatment combinations for each patient while providing the highest standard of care. "Our practice is multidisciplinary in that we try to offer every procedure. We specialize in facelifts, breast surgery and body contouring," says Dr. Kapoor. "At our practice, we have several specialists to perform any type of aesthetic procedure to transform the face and body." Above all else, the highly skilled surgeons pride themselves on their ability to provide concierge-style care for every patient.

balance and proportion.*

WHO WE ARE

1.

WHAT IS THE MOST OUTRAGEOUS MEDICAL MYTH YOU'VE HEARD?

That every surgeon is an expert at every surgery. Some physicians who claim to be experts aren't qualified the way they say they are or will perform a surgery even when a patient isn't a good candidate. This amounts to more patients having to undergo revision surgeries. All of our doctors are board-certified and matched with the right patients to ensure a satisfactory result

2.

WHAT WE LOVE MOST ABOUT OUR PROFESSION

Making patients happy. They choose us of their own volition for an elective procedure. We never forget that!

3.

WHAT IS YOUR FAVORITE PROCEDURE TO PERFORM?

We both share an appreciation for all types of breast surgery including breast augmentation, breast lifts, breast reductions and revision breast surgery

4.

HOW DO YOU MANAGE PATIENT EXPECTATIONS?

Patients today are bombarded with false information on social media. At our practice, we're brutally honest with our patients, but it is for their benefit. If a result is not achievable, we will let them know and advise them of better options

5.

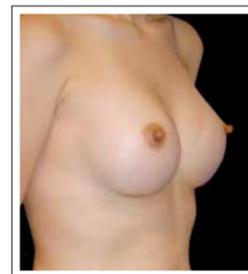

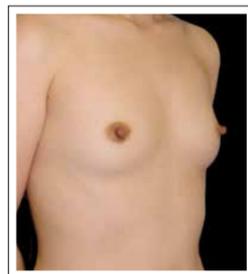

WHAT DO YOU THINK IS THE MOST EXCITING THING GOING ON IN YOUR FIELD RIGHT NOW?

The use of stem cells in nonsurgical facial rejuvenation—it's very exciting to see that unfold. As far as body contouring, combining modern fat transfer techniques with traditional liposuction allows us to take our results to the next level

6.

WHAT IS MOST UNIQUE ABOUT YOUR PRACTICE?

Our level of expertise—we have both completed advanced fellowship training in aesthetic surgery

Maintaining a Natural Look

This 26-year-old patient wanted a natural-looking volume boost to her breasts. To take her from an A cup to a full B cup, a breast augmentation was performed using 350-cc implants.
